

LTO battery sourcing.

Canada-China. Based in Toronto.

KANYU supports Canadian businesses sourcing lithium-titanate (LTO) batteries from China. We coordinate product enquiries and communication with the manufacturer.

Product information

Cells

Cell data sheets are available for initial review.

Modules & battery packs

Enquiries are reviewed with the manufacturer against your application. Configuration and availability require confirmation.

Enquiry support

Product & quotation enquiries

Request relevant product information, quotations and lead times for the specification and quantity you need.

Technical enquiries

Coordinate manufacturer responses on electrical and mechanical requirements, charging, operating conditions and product documentation.

Sample enquiries

Check the proposed sample configuration, price and timing with the manufacturer.

Engineering, product suitability and warranty terms are confirmed by the responsible manufacturer or engineering provider.

Discuss your requirements

Share the equipment or application, whether you need cells, modules or a battery pack, your specification and target timing.
